

Level limit measurement in quartz sand

The challenge

The vibrating sensor VIBRANIVO VN4020 offers a perfect cost-/performance ratio and best technical attributes. It works at a process pressure of up to 10 bar and has the necessary mechanical stability due to its stainless steel extension.

Our solution

The vibrating sensor VIBRANIVO VN4020 offers a perfect cost-/performance ratio and best technical attributes. It works at a process pressure of up to 10 bar and has the necessary mechanical stability due to its stainless steel extension.
